In Indiana Land Agency.

The subscriber having of much expense of time and labor prepared themselves for the business of a systematic and General Land Agency, offer their services to the public, for the Sale of Lands, Investigation of Titles, Payment of Taxes, procurement of Patents, and other services pertaining to a land agency business.

Having provided themselves with numerous and accurate maps of the different counties, and of the State, and having personally visited a large portion of Northern Indiana, they are prepared to furnish extensive and thorough information with regard to the ownership, soil, location and value of lands, which will be afforded gratuitously to all who may desire such information.

As agents for the owners, they offer for sale large bodies of valuable land, well adapted to farming purposes, situated as follows, viz:

Acres.

Allen County 15300 Noble County 8847
Allen 7624 Whitley 7160
Steuben 2863 Huron 3360
Lagrange 554 Wabash 7703
Elkhart 80 Miami 827
Kosciusko 548 Carroll 160
Blackford 524 Cass 64
Jay 449 Fulton 1389
Wells 2360 Marshall 337
Clinton 516 White 900

Which land will be sold for cash; or part cash, the remainder on a reasonable credit.

They also offer for sale

Several Valuable Improved Farms,

In the Counties of Allen, Huntington and Wabash, and a large number of

TOWN LOTS,

In Fort Wayne, Huntington, Wabash Town, Lagro and Peru, which will be sold on the same terms as the above. Prompt attention will be given to all communications from persons desiring to purchase or wishing for information. WORTINGTON & HUGH.

Atty's & Land Agents.

Fort Wayne, July, 1846.

11-4

Land for sale.

The subscriber offers for sale on accommodation terms, several valuable tracts of improved and wild lands, situated in Allen County. Persons wishing to settle in this county, would find this a favorable opportunity to procure a home.

THOS. HAMILTON.

FOR SALE.

THE Valuable Mill property belonging to Fairfield & Freeman, 14 miles south of town. This property consists of a Fouring Mill with three run of stones, in good order; a first rate new Saw Mill, with a house attached to it to make shingles, lath, and put up other machinery. Also, a dwelling house, stables, a house for Country customers, and every convenience, and about 9 acres of land and another privilege on the East side of the River. This stream affords a plenty of water at any season of the year, and its situation makes it the best mill property in the west.

Mr. Freeman's health is so poor he cannot attend to the business, and not being convenient for me to attend, as I live to far off, &c. The payments will be easy, as I am not much in want of money. I should like to keep a shot in the locker. Persons wishing to purchase, please call on the subscriber.

ASA FAIRFIELD.

Fort Wayne, Aug. 5, 1846. 6

SHAWLS.—A splendid assortment of Wool, Silk, and Cashmere Shawls, for sale by HILL, WILSON & Co.

Linseed Oil.

HAVING made arrangements with the Day Mill for our supply of Linseed Oil, we are now enabled to supply a much superior article to dealers, by the bbl., at the Cincinnati price, without the addition of freight and barrels that have been charged by an agent preferred for the business, which will make a saving of at least 5 cents in a barrel, and is equal to the price of the best oil in the market. We have a large quantity of the best oil in barrels, and will sell at a price of 25 cents per gallon, or 23 cents per barrel.

At retail we still sell at our usual rates.

H. B. REED.

GLOVES & MITTENS—every kind, E. D. BARTLETT & Co.

ZEPHYR HOODS, and Coats, at E. D. BARTLETT & Co's

COLLINS' and Simmons' AXES for sale, S. & W. S. EDSALL

LATER FROM MEXICO.

The Proposals for Peace—Movement of General Cadwalader's Command—Mexican Demand for \$30,000,000—Capture of Mexican Officers—Penal y Peña again President of Mexico—Attempted Outbreak in the City of Mexico—Outbreak attempted at Puebla—Skirmish between Jarauta and Col. Hays—Jarauta supposed to be Killed, &c.

Gen. Cadwalader's command, consisting of the 4th Artillery, 6th, 8th, and 11th Infantry, left the city of Mexico on the 3d inst. for Toluca. The troops were in fine spirits at the prospect of active service once more. They had reached Lerma at the last accounts without molestation.

Col. Withers' command, which was reported by the last arrival to have been cut to pieces, had arrived safely at Real del Monte, without molestation.

Major Taliaferro, from Real del Monte, has arrived at Mexico in charge of \$150,000 worth of silver bars, being part of the assessment levied by Gen. Scott on the State and Federal District of Mexico.

The "World" of Guadalajara, of the 17th ultmo, says that the news had reached there from Mazatlan, announcing that 500 Chihuahua rangers had attacked the American possessions of Lapan and San Jose, and defeated the Americans, burning both places. Three American vessels had left Mazatlan to render assistance.

Special correspondence of the *Phœnix*.

CITY OF MEXICO, Jan. 12, 1848.

You will find in one of the letters of the gentleman who contributed his correspondence with you during my indisposition, an account of the capture of Gen. Valencia, the renowned hero of Contreras, in this valley, by a party of Texan Rangers, under command of Col. Wynkoop, of the Pennsylvania Volunteers.

From all I can learn, the expedition was managed in the most successful manner, and the party came very nearly laying hands on Padre Jarauta himself, who has been busy in the vicinity some weeks.

Yesterday, Dominguez, the captain of the Mexican spy company, arrived with a small mail, and brought intelligence of his having a brush with a party of the enemy's cavalry between Ojo de Agua and Nopalucan. The cavalry he dispersed, and took prisoners Generals Torrejon, Minon, and Gaudin, who were with the party, and delivered them over to Col. Childs at Puebla, together with two American deserters whom he found with the party. All these prisoners have been liberated on parole. The policy of liberating these men I think extremely doubtful.

It is impossible to say when there will be a movement towards any of the cities still in the possession of the enemy. The commander-in-chief, confident, perhaps, of a peace resulting from the proposition which it is said the Mexican government has made, is not disposed to disturb the deliberations of the Government at Queretaro by sending an expedition in that direction, or to create new causes of animosity by making additional conquests until the result of the proposition is known.

A bundle of dispatches from Washington arrived yesterday with Col. Dominguez, and it is possible that an onward movement may be ordered. If it is ordered soon, there is little, if any, probability of resistance being offered to our progress. There is not at any one point that I can learn sufficient men and military supplies to resist one thousand of our soldiers.

We have news to-day from Queretaro—Anaya, who was elected President after Santa Anna's resignation, has gone out of office, the term having expired, and Penal y Peña, by right of his office as Chief Justice, president fills the vacant chair, or has been elected President—I cannot positively learn which, but I am inclined to believe the former. He has declared that he will pursue the policy of Anaya, who is supposed to be favorable to our cause.

On Monday last the commander-in-chief was informed of a movement designed here to attack the quarters of the officers of the army, and, if possible, to take them prisoners or kill them. The plan was, that the popular or, as much of it as could be induced, to take part in the conspiracy should rise and assist by a body of Guerrillas which were to enter the city at a certain hour, make an attack. During the day the commander-in-chief informed all the chief officers of the intended attack, designated rallying points for the different regiments, and made every disposition necessary to defeat the invasion.

At night scarcely a Mexican was to be seen in the streets; showing that the whole population had a knowledge of what was to be attempted. The precaution adopted, it is supposed, prevented an attempt to execute the plan.

During the night, Lieut. Baker, of the 5th Indian regiment, commanding a patrol, came in sight of two carts near the Plaza de Torre, in the south-eastern part of the city, one of which, containing one hundred stand of arms, he captured; the other he was unable to come up with before it was placed in concealment.

Yesterday, Col. Hays and some of his men had a brush with Padre Jarauta, at a place called San Juan, some twenty or thirty miles from here. Although the guerrillas far exceeded the Texans, they did not want for more than the first charge, but fled in great confusion. Jarauta was seen to fall from his horse, which, together with his lance and cloak, fell into the hands of Col. Hays. His saddle was bloody; from which it is inferred that the recent scoundrel was killed.

A conspiracy has been set on foot, in Puebla, to assassinate the Mexican Governor of the State of Puebla, Don Raphael Izquierdo, General Rea and some of his worthy associates. Their letters were intercepted by Col. Childs, from which it appears that their first object was to get Governor Izquierdo out of the way by assassination, and then murder some of the peaceably disposed inhabitants of Puebla, seize the reigns of Government, and proclaim Rea dictator. Gov. Izquierdo is known to be a strong advocate of peace. The project, nipped in the bud, has caused proclamation to be issued by Col. Childs, the American Civil and Military Commander of the Department.

Among the passengers on the Maria Burt, from the Rio Grande, came Lieut. Franklin, of the Topographical Engineers—a gallant young officer, who rendered himself conspicuous at Buena Vista as a member of General Wool's staff, by his gallantry. Lieut. Franklin is due from General Wool's head-quarters at Monterey, which place he left on the 13th instant.

Just before he left an express was received from Sabine from Col. Hauntrancek, in command of the forces there, stating that a report had reached him from a source entitled to credit, that a force of Mexicans, 10,000 strong, under command of General Bustamante, were marching down upon Saltillo. The report even particularizes the points from whence the troops had been raised but so frequent are the stampedes upon that line, very little credit was attached to the report. Our forces there were in good condition, and perfectly willing to be attacked whenever the enemy thought best to make the experiment.

Upon the receipt of this news Gen. Wool had apprised the merchants of Monterrey, Cuernavaca, Matamoras, and other posts, that he could afford them no protection in the way of escorts. From another source we learn that Col. Carasco, a Mexican officer who has rendered himself rather conspicuous, is at Monterrey, proposing to enter into negotiations with Gen. Wool for a pronunciamento against the existing government of Mexico and in the name of the United States, on the part of the States of Tamaulipas, Nueva Leon, and Co-

ahuila. He also proposes to bring in General Canales, that cowardly chief of Guerrillas who has given us so much trouble up the Rio Grande. Col. Carasco has been for a long time residing in Matamoras with his family, and appears friendly to the Americans. We know not what degree of credit to attach to this report.

MEXICO, Jan. 12, 1848.

At last accounts Santa Anna was at Tehuacan, in the State of Puebla. He has with him a large number of chiefs and officers, and appears to be awaiting the action of the Mexican Congress. A soldier belonging to the 1st Dragoons was hung on Wednesday at the Puebla gate for murdering a Mexican. The murder was a most unprovoked one, and there is no doubt he deserved his fate.

Pence within a short time is now confidently predicted here by persons of intelligence and those who have access to reliable information. By some it is said the Mexican Government, after its commissioners were informed by Gen. Scott and Mr. Trist that they had no powers to negotiate, proposed that commissioners should be appointed by the two Governments, to meet at Havana. Others, and I think they come nearer the truth—say that the Mexican Government had made a proposition, and that it had been transmitted to Washington. They now go so far as to say that the terms are Mr. Trist's ultimatum in the negotiations at Tacubaya, with the difference that instead of \$15,000,000, as was proposed by Mr. Trist, \$20,000,000 is asked. I fervently hope this proposition, if it has been made, will not be accepted, and that the apparent disposition of the Mexicans to make peace will not prevent that energetic prosecution of the war recommended in the President's message.

FROM MEXICO.—The following is part of Gen. Scott's orders in reference to levying taxes on the Mexicans:

HEAD QUARTERS OF THE ARMY, Mexico, Dec. 1, 1848.

GENERAL ORDER—No. 395.

Sec. 1. To support in part the military occupation of Mexico by the army of the United States, the several States of this Republic already occupied, and others as they shall become occupied, are, or will be assessed by the year, in dollars, as follows:

Chihuahua,.....	\$49,188
Coahuila,.....	5,659
Chiapas,.....	21,692
Durango,.....	85,536
Guauabuerto,.....	250,876
Jalisco,.....	236,338
Mexico, State and Federal Dist.,.....	658,132
Michoacan,.....	287,712
Nueva Leon,.....	50,437
Puebla,.....	424,276
Oaxaca,.....	64,160
Queretaro,.....	84,944
San Luis,.....	111,260
Sinaloa,.....	88,724
Sinora,.....	5,000
Tolosa,.....	59,060
Tamaulipas,.....	71,332
Vera Cruz,.....	241,548
Zacatecas and Aguascalientes,.....	49,076

ANOTHER PRONUNCIAMENTO!

We see the *Ranchero* is out again with another column of trash in the last times. The poor wretch is evidently insane, and it is a pity some kind friend—if friend he has—does not at once put a strait jacket on him, or at least place him under such restraint as would save him from exposing himself to the laughter and jeers of the populace. But, alas! after all the toil, the anxiety, the dark intrigues of long years, to obtain wealth, he finds himself in his declining years, without a friend to counsel or advise him. His selfish course has prevented his making personal friends, and his political ones are not well pleased to see him exposing and for ever damning himself in the eyes of his fellow citizens, to interfere and save him from the miserable fate to which he is hastening.

There is only one point in this pronunciamento which is deserving notice,—and that is his threat to keep an account of all we may do.

Mr. Scott, by letters received from Germany that a Dr. Jager has invented an improved method of quieting the charge in fire-arms:

Dealers of Death.—The Germans do every thing now-a-days which the Yankees do not.

We understand by letters received from Germany that a Dr. Jager has invented an improved method of quieting the charge in fire-arms:

The gun is loaded with a cartridge containing both powder and shot, or with two cartridges, one containing powder and the other shot, or with a cartridge containing powder shot put in nose and covered with wadding. The end of the cartridge is so shaped as to fit into the conical chamber of the breech of the gun, and contains a small quantity of fulminating powder. Immediately over this is the touch-hole. The cock of the gun is furnished with a small spike which enters the touch-hole and striking the cartridge, instantly explodes it. There is no nipple and no cap. The quantity of loading and firing is increased three-fold. The interior of the barrel is kept clean and the discharge is quicker than in ordinary guns. It is obvious how great an improvement this is for military guns, especially for cavalry, and how useful it is for sportsmen. Some of the guns exhibited had the cock beneath the stock, forced to strike upwards, and protected by the guard. The invention has been shown to his Royal Highness Prince Albert, who has expressed himself highly pleased with it.

There is only one point in this pronunciamento which is deserving notice,—and that is his threat to keep an account of all we may do.

Mr. Scott, by letters received from Germany that a Dr. Jager has invented an improved method of quieting the charge in fire-arms:

The gun is loaded with a cartridge containing both powder and shot, or with two cartridges, one containing powder and the other shot, or with a cartridge containing powder shot put in nose and covered with wadding. The end of the cartridge is so shaped as to fit into the conical chamber of the breech of the gun, and contains a small quantity of fulminating powder. Immediately over this is the touch-hole. The cock of the gun is furnished with a small spike which enters the touch-hole and striking the cartridge, instantly explodes it. There is no nipple and no cap. The quantity of loading and firing is increased three-fold. The interior of the barrel is kept clean and the discharge is quicker than in ordinary guns. It is obvious how great an improvement this is for military guns, especially for cavalry, and how useful it is for sportsmen. Some of the guns exhibited had the cock beneath the stock, forced to strike upwards, and protected by the guard. The invention has been shown to his Royal Highness Prince Albert, who has expressed himself highly pleased with it.

Dr. Townsend's Sarsaparilla
THE MOST EXTRAORDINARY MEDICINE IN THE WORLD.

This Extract is put up in quart bottles; it is six times stronger than any other Sarsaparilla Extract ever sold; it cures diseases without vomiting, purging, stitching or distressing the patient.

GREAT FALL & WINTER MEDICINE.

The greatest beauty and superiority of this Sarsaparilla over all others is that it eradicates the disease from the body. It is one of the best Fall and Winter medicines ever known; it not only purifies the whole system and strengthens the person, but it creates new, pure, and rich blood, which is the grand secret of its wonderful success. It has performed within the past two years, more than 35,000 cures of every kind of disease; at least 20,000 of these were considered incurable.

More than 3,000 cases of Chronic Rheumatism; 4,000 cases of Dyspepsia; 2,000 cases of Debility and Want of Energy; 7,000 cases of the different Fevers and Complaints; 2,000 cases of Scrofula; 1,000 cases of the Liver Complaint; 2,000 cases of the Kidneys and Droopy; 8,000 cases of Consumption; 10,000 cases of Ulcers, Diseases of the Face, &c., &c., together with numerous cases of Sick Headache, Pain in the Side and Chest, Spinal Affectio., &c., &c.

This we are sure is the best medicine, but we have learned that Physicians and our Agents from all parts of the United States, inform us of extraordinary cures. R. Van Buskirk, Esq., one of the best Physicians in the country, has written to us, to say he can refer to more than 150 cases in that place alone. There are thousands of cases in the City of New York, which we will refer to with pleasure, and to many of them. It is the best medicine for the prevention of disease known. It undoubtedly saved the lives of more than 5,000 CHILDREN THE PAST YEAR!

It removed the cure of disease, and prepared them for the Summer season. It has never been known to injure in the least the most delicate child.

RHETORISM.

This Sarsaparilla is used with the most perfect success in Rheumatic complaints, however severe or chronic. The remarkable cure it has performed and the number of cases it eradicates from the system, even when the limbs are almost dead.

Hear Mr. Seth Terry, one of the oldest and most respected Physicians in the City. The following is an extract of a letter received from him:

Dr. Townsend's Sarsaparilla has won me two bottles of your Sarsaparilla, and it is excellent—curing a Chronic Rheumatism which I have been subject to, from an injury received several years ago, in a public stage. Please send me two bottles of the Dr. Seymour. I have cured two of our principal physicians and recommend your Sarsaparilla.

SIMONETT CURE FOR CURE.

Cleanness and Strength. Convalescence, the best Branships, Consumption, Liver Complaints, Coughs, Coughs, Asthma, Spitting of Blood, Soreness in the Face, Hectic Flux, Night Sweats, Defiles or Profuse Expectoration, Pain in the Side, &c., have been cured.

Dr. Townsend's Sarsaparilla, which is the best, has been used with great care and at the lowest prices, we are confident we shall be able to

JAMES HUMPHREY,

JOHN BROWN.

Fort Wayne, Sept. 24th, 1847.

GIRLS READ THIS.

You who have pale complexion, dull eyes, blisters on the face, rough skin and are out of spirits, use a bottle or two of Dr. Townsend's Sarsaparilla. It will cleanse your blood, and soon entirely relieved her, as well as myself, and she is well now, and hearty as any child can ever be. Persons who have pale complexion, and are out of spirits, use a bottle or two of Dr. Townsend's Sarsaparilla, and find yourself in health, and I can now satisfy all your friends with my name in the papers, if you choose.

My little girl, who is three years old, has been greatly relieved by this medicine, and is now able to walk.

Persons who are weak, and have much strength lost, and the want of appetite, use a bottle or two of Dr. Townsend's Sarsaparilla, and find yourself in health, and I can now satisfy all your friends with my name in the papers, if you choose.

My little girl, who is three years old, has been greatly relieved by this medicine, and is now able to walk.

Persons who are weak, and have much strength lost, and the want of appetite, use a bottle or two of Dr. Townsend's Sarsaparilla, and find yourself in health, and I can now satisfy all your friends with my name in the papers, if you choose.

Nothing can be more surprising than its curative effects on the human frame, and it is a powerful and lasting cure, once begun, and becomes robust and full of energy under its influence. It immediately counteracts the nervousness of the female frame, which is the greatest evil of all.

It is a powerful and safe medicine, and is a certain preventive for any of the numerous and horrible diseases to which females are subject at this time of life. This particular may be delayed several years, but it will be of great service to us.

Persons who are weak, and have much strength lost, and the want of appetite, use a bottle or two of Dr. Townsend's Sarsaparilla, and find yourself in health, and I can now satisfy all your friends with my name in the papers, if you choose.

Dr. Townsend's Sarsaparilla has been continually prescribed for women, and has kindly sent us the following certificate. It tells its own story.

Dr. Townsend—The undersigned is pleased to inform you that three of my children have been cured of the Scrofula by the use of your excellent medicine. They were afflicted very severely with bad sores; have taken only four bottles, and took them away with the greatest relief, and myself under deep obligation. Yours, respectfully,

ISAAC W. CRAIN, 106 Wooster St., New York, March 1, 1847.

OPINION OF PHYSICIANS.

Dr. Townsend is almost daily receiving orders from Physicians in different parts of the country.

Dr. Townsend—The undersigned, Physicians of the City of Albany, have in numerous cases prescribed Dr. Townsend's Sarsaparilla, and believe it to be one of the most valuable preparations in the market.

H. P. PULLING, M. D. J. W. WILSON, M. D. R. B. BARTLETT, M. D. A. E. ELMENDORF, M. D. Albany, April 1, 1847.

UNITED STATES OFFICER.

Capt. G. W. McLean, of the United States Marine Corps and members of the New Jersey Legislature, has kindly sent us the following certificate. It tells its own story.

Dr. Townsend—The undersigned is pleased to inform you that three of my children have been cured of the Scrofula by the use of your excellent medicine. They were afflicted very severely with bad sores; have taken only four bottles, and took them away with the greatest relief, and myself under deep obligation.

Yours, truly,

LATER FROM MEXICO.

The Proprietary Paper—Alleged of Gen. at Cuernavaca, Cuernavaca—Honest Demand for Safety—Our—Capture of Mexican Officers—Pope's Protagonist President of Mexico—Alleged Outbreak in the City of Mexico—Outbreak attempted at Puebla—Saxons between friends and Col. Hayes—Jardina supposed to be Killed, &c.

Gen. Cadwalader's command, consisting of the 4th Artillery, 6th Inf., and 11th Infantry, left the city of Mexico the 3d inst. for Toluca. The troops were in fine spirits at the prospect of active service once more. They had reached Lerma at the last accounts without molestation.

Col. Withers' command, which was reported by the last arrival to have been in Mexico, had arrived safely at Real del Monte without molestation.

Major Talavera, from Real del Monte, has arrived at Mexico in charge of \$150,000 worth of silver bars, being part of the assessment levied by Gen. Scott on the State and Federal District of Mexico.

The "World" of Gladakas, of the 2d Inf., claims, says, that the news had reached him from Mazatlan, announcing that 5000 Texan riflemen had attacked the American vessels of Layana and San Jose, and had beaten the Americans, burning both ships. These American vessels had left Mazatlan to render assistance.

Special correspondence of the *Evening City* of Mexico, June 12, 1846.

You will find in one of the letters of the gentleman who confined his correspondence with you during my indisposition, an account of the capture of Gen. Valencia, the renowned hero of Contreras, and Col. Arista, by a party of Texas Rangers, under command of Col. Wynkoop, of the Pennsylvania Volunteers. You will learn, that the expedition was managed in the most skilful manner, and the party came very nearly laying hands on Padre Jarama himself, who has been in his vicinity some weeks.

Yesterday, Dominguez, the captain of the Mexican spy company, arrived with a small band, and brought intelligence of his having a brush with a party of the enemy's cavalry between Ojin de Agua and San Luis. The cavalry dispersed, and took prisoners Generals Torrejon, Mino, and Hamil, who were with the party, and delivered them over to Col. Childs at Puebla, together with two American deserters whom he found with the party. All these prisoners have been brought on parole. The policy of liberating these men I think extremely doubtful.

It is impossible to say when there will be a movement towards any of the cities still in the possession of the enemy. The commander-in-chief, confident, perhaps, of a peace resulting from the proposition which it is said the Mexican government has made, is not disposed to disturb the deliberations of the Government at Queretaro by sending an expedition in that direction, or to create new causes of animosity by making additional conquests until the result of the proposition is known.

A bearer of dispatches from Washington arrived yesterday with Col. Dominguez, and it is possible that an onward movement may be ordered. It is ordered soon, there is little, if any, probability of resistance being offered to our progress. There is not, or not one point, that I can find sufficient men and military supplies to hold one thousand of our soldiers.

Yesterday news reached from Queretaro, Anaya, who was elected President after Santa Anna's resignation, gave up his office, the term having expired, and Yunes Y. Pembe of his office as Chief Justice, presented his resignation, and has been elected President. I cannot positively learn which, but I am inclined to believe the former. He has declined that he will pursue the policy of Anaya, who is supposed to be favorable to us.

On Monday last the commander-in-chief was informed of a movement designed here to attack the quarters of the officers of the army, and, if possible, to take them prisoners, or kill them. The plan was that the principal, or, if possible, all of its members, should be taken, and driven to the city of Mexico, and held there, to be disposed of by a body of Mexicans, which were to enter the city in a certain hour, and make the attack. During the day the commander-in-chief informed all the chief officers of the intended attack, designated rallying points for the different regiments, and, in case of an instant necessity to defend themselves. At night, however, a Mexican was to be seen in the streets, telling that the whole population had a knowledge of what was to be attempted. The precaution adopted, it is supposed, prevented an attempt to execute the plan.

During the night, Col. Hays and some of his men had a brush with Padre Jarama, a plumed chief of the Texan cavalry, who, it is said, had been sent to the south. Although the guerrilla for repelled the Texans, they did not want for more than the first charge, but fled in great confusion. Jarama was soon to fall into his hands, which, together with his horse and cloak, fell into the hands of Col. Hays. His saddle was broken; from which it is inferred that the reverend scoundrel was killed.

George—Herschell D. Johnson, democrat, has been appointed by the Governor to fill the vacancy in the U. S. Senate, caused by the resignation of Mr. Colquitt.

Hon. J. B. Walker, the able and efficient head of the Treasury Department, in a letter to a friend in Mississippi, announces his intention of retiring to private life in March, 1849.

The state of his health is such as to render him absolutely necessary to the service of the nation.

At night, however, a Mexican was to be seen in the streets, telling that the whole population had a knowledge of what was to be attempted.

The precaution adopted, it is supposed, prevented an attempt to execute the plan.

During the night, Col. Hays and some of his men had a brush with Padre Jarama, a plumed chief of the Texan cavalry, who, it is said, had been sent to the south. Although the guerrilla for repelled the Texans, they did not want for more than the first charge, but fled in great confusion. Jarama was soon to fall into his hands, which, together with his horse and cloak, fell into the hands of Col. Hays. His saddle was broken; from which it is inferred that the reverend scoundrel was killed.

A conspiracy has been set on foot in Puebla to assassinate the Mexican Governor of the State of Puebla. Dan Rapal Izamay, by General Riva and some of his worthy associates. Their letters were intercepted by Col. Childs, from which it appears that their first object was to get Governor Juan out of the way by assassination, and then, render some of the preceably disposed inhabitants of Puebla, seize the reigns of Government, and proclaim Riva dictator. Col. Izamay is known to be a strong advocate of peace. The project, nipp'd in the bud, has caused proclamation to be issued by Col. Childs, Civil and Military Commander of the Department.

Among the passengers on the Maria Buri, from the Rio Grande, came Lieut. Franklin, of the Topographical Engineers—a gallant young officer, who, rendered most conspicuous at Buena Vista as a member of General Wool's staff by his gallantry. Lieut. Franklin is direct from General Wool's headquarters at Monterrey, which place he left on the 15th instant.

Just before he left an express came for him from Schulz from Col. Hamilton, in command of the forces there, stating that a report had reached him from a source entitled to credit, that a force of Mexicans, 4000 strong, under command of General Bustamante, were marching down upon Saltillo. The report even particularizes the points from whence these troops had been raised, but so far as we can determine, it is upon that line, very little credit was attached to the report. Our forces, there were in good condition, and perfectly willing to be attacked whenever the enemy thought best to make the experiment.

Upon the receipt of this news Gen. Wool had apportioned the march of the Army—Matamoras, and other posts, that he could afford them to protection in the way of events. From another source we learn that Col. Bustamante, a Mexican officer who has rendered himself rather conspicuous, is at Monterrey, preparing to enter into negotiations with Gen. Wool for a permanent arrangement with the existing government of Mexico and the United States, on the part of the States of Tamaulipas, Nuevo Leon, and Co-

ahuila. He also proposes to bring in General Canales, that cowardly chief of Guerrillas, who has given us so much trouble upon the Rio Grande. Col. Canales has been for a long time residing in Matamoras with his family, and appears friendly to the Americans. We know not what degree of credit to attach to this report.

MEET, Jan. 12, 1846.

At last accounts Santa Anna was at Toluca, in the State of Puebla. He has with him a large number of officers, and appears to be awaiting the action of the Mexican Congress. A force belonging to the 1st Dragoons was being on Wednesday at the Pueblo, for the purpose of bringing a Mexican. The number was not mentioned, one, and there is no doubt he deserved his fate.

Present with a short time ago, was a confidentially produced by persons of intelligence by those who have access to reliable information. By some it is said the Mexican documents were brought to Washington at the Pueblo, and the Mexican government, and the American, had been a Mexican. The number was not mentioned, one, and there is no doubt he deserved his fate.

The various rumors of peace are now believed to have been entirely without foundation. Mr. McLish, the British Agent in Mexico, has, it is said, made several propositions to Mr. T. and Gen. Scott, but they are nothing to prove that he had any authority.

It is reported that the Mexican government, and the American, had been a Mexican. The number was not mentioned, one, and there is no doubt he deserved his fate.

THE SEASON.—Navigation open.—The steamboat United States, left Buffalo for Detroit, with a full cargo, on the 5th inst.

At the last accounts from New York the weather was extremely mild. Steam-boats were running on the North River.

In Boston the season has been to mild that serious apprehensions are entertained that the ice—most profitable crop rated in the Bay State—will prove a failure.

NO PEACE!

The President is reply to a resolution of the House, that serious apprehensions are entertained that the ice—most profitable crop rated in the Bay State—will prove a failure.
